SUMMARY

Frontend Software Development Engineer with 3+ years building scalable SaaS UIs for enterprise logistics (WMS, OMS, TMS) serving **100+** tenants and **52K+** orders/day. Expertise in React.js, Next.js, TypeScript, Redux, real-time systems (Pusher, Beam), and RBAC (CASL). Delivered measurable impact: **40%** faster page loads, **12%** higher warehouse utilization, and **10%** faster order fulfillment.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3 / SCSS
- **Frontend:** React.js, Next.js, Redux, Redux Toolkit, React Query, REST APIs, Axios, CASL (RBAC), WebSockets, Pusher, Beam, Sentry
- **Styling:** Tailwind CSS, Bootstrap, ReactStrap, SCSS, Responsive Design
- **Tooling:** Git, GitHub, VS Code, Postman, Vite, Webpack, Netlify, Heroku, Figma
- **Concepts:** Component Architecture, State Management, Code Splitting, Lazy Loading, Caching, Performance Optimization, Real-time UI, RBAC, Agile

PROFESSIONAL EXPERIENCE

Software Development Engineer (Frontend)

Jan 2023 – Present

Omniful Technologies

- Owned frontend for **WMS**, **OMS**, and **TMS** modules used by **100+** enterprise tenants processing **52K+** orders/day—covering inventory, shipping, cancellations/returns, and real-time order tracking.
- Cut page load times by **40%** via React Query caching, route-level code splitting, lazy loading, and memoized list rendering across table-heavy logistics screens.
- Architected a reusable React component library and shared hooks, reducing UI inconsistency and cutting duplicate UI work by **~40%** across WMS/OMS/TMS.
- Built WMS inventory and shipping UIs with React.js, Redux Toolkit, and Tailwind; contributed to a **12%** increase in warehouse utilization.
- Engineered real-time order/inventory tracking in TMS with **Pusher** (sub-100ms latency) and **Beam** notifications, enabling **10%** faster order fulfillment.
- Engineered route- and action-level RBAC with **CASL**; delivered OMS cancellation/return flows and REST API integrations across order, inventory, and shipment surfaces.

PROJECTS

Warehouse Management System (WMS) — *React.js, TypeScript, Redux Toolkit, Tailwind, React Query*

- Built responsive inventory and shipping workflows for warehouse operators across **100+** tenants, contributing to a **12%** increase in warehouse utilization.
- Optimized table-heavy screens with code splitting, lazy loading, and memoized rendering for fast pick/pack/ship UIs under high SKU volume.

Order Management System (OMS) — *React.js, TypeScript, Redux Toolkit, CASL, REST, Tailwind*

- Created reusable React components for cancellations and returns, reducing order-lifecycle delays across a platform processing **52K+** orders/day.
- Applied **CASL** route- and action-level RBAC so multi-tenant roles only access permitted order actions.

EDUCATION

Full Stack Web Development, Masai School, Bangalore

2021 – 2022

Bachelor of Computer Applications, Himachal Pradesh University

2019 – 2021
